

MONITORING OF WASTE SERVICES FOR SORTED COMPONENTS OF MUNICIPAL WASTE IN THE CAPITAL CITY OF PRAGUE

VOLOSINOVA, D.; KORINEK, R.; MAKOVCOVA, M.

TGM Water Research Institute, p.r.i.

Keywords: waste — waste management —
sorting — municipal waste — monitoring

Management of each municipality, region or state needs for its decision-making and planning basic input data, which prove actual facts. The easiest way to obtain data on production and waste management is to monitor at pre-set regular intervals. This article describes the progress and partial results of the monitoring of waste services in the Capital City of Prague, which is carried out within the framework of the project “Wastes and their prevention – practical procedures and activities in implementation of obligations of the Regional Waste Management Plan of the City of Prague”.
