

UNREALIZED TOWER WATER TANKS

KORINEK, R.; KRISTOVA, A.

TGM Water Research Institute, p.r.i., Ostrava Branch

Keywords: elevated water tank – unrealized design – project

This paper presents several cases of unrealized elevated water tank projects in the Czech Republic. It deals with the technical solution of unrealized objects and at the same time presents the reasons why the designers, official bodies or investors led to the search for another solution. In the end, it tries to reflect briefly on the values that were gained or lost by the implementation of new projects instead of the originally designed ones.
